Sundancer Poplar
*Populus ‘ACWS151’*

**Height:** 39 feet  
**Spread:** 10 feet  
**Sunlight:**  
**Hardiness Zone:** 3a  
**Other Names:** AC-Sundancer, Hybrid Poplar  

**Description:**  
A columnar male variety that's fast growing and tolerant of the worst growing conditions; this variety was developed for high disease resistance; has an aggressive root system, so don't plant near houses; makes a great windbreak or quick shade tree  

**Ornamental Features**  
Sundancer Poplar has green foliage throughout the season. The large heart-shaped leaves turn yellow in fall. Neither the flowers nor the fruit are ornamentally significant.  

**Landscape Attributes**  
Sundancer Poplar is a deciduous tree with a narrowly upright and columnar growth habit. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.  
This tree will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;  
- Invasive  
- Disease  

Sundancer Poplar is recommended for the following landscape applications;  
- Shade  
- Windbreaks and Shelterbelts
Planting & Growing

Sundancer Poplar will grow to be about 39 feet tall at maturity, with a spread of 10 feet. It has a high canopy with a typical clearance of 6 feet from the ground, and should not be planted underneath power lines. As it matures, the lower branches of this tree can be strategically removed to create a high enough canopy to support unobstructed human traffic underneath. It grows at a fast rate, and under ideal conditions can be expected to live for 60 years or more.

This tree should only be grown in full sunlight. It is an amazingly adaptable plant, tolerating both dry conditions and even some standing water. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
